

B-3234 - B-3242
45-11 Henrietta St. (South side)
Baltimore, Md.
Private access

1845-1855

This side of Henrietta St., west of Light St., is improved by several different groups of two story plus attic, two bay wide brick houses with gable roofs, built by various local house carpenters including William and Samuel Harman. The houses were built contemporaneously with John S. Gittings's similar rows to the south along Hamburg and Light Streets and were intended for a working class market. Many are currently being renovated.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This two story plus attic brick house with gable roof was built in the early 1850's as part of the development of this side of Henrietta St. The house has been covered with formstone.

The house is two and a half stories in height, 10 1/2' wide, and occupies a lot 54 1/2' deep. The house is two rooms deep and has a one story high, two bay deep rear addition, followed by a one story high, one bay deep frame addition. The house is constructed in running bond but the facade has been covered with formstone. The low-pitched gable roof has a simple brick cornice. There is a double hooded chimney located along the east side of both the front and rear roof gables.

Although the original treatment of the door and window lintels has been hidden by the formstone covering, it is apparent that the lintels were flat. All of the window openings are filled with 1/1 double hung sash. A modern panel door with an upper fanlight is set beneath a single light transom. The house sits on a fairly high basement, the entrance being reached by three stone steps. A square-shaped coal opening is located to the left of the steps.
